# SplatZ...

... the non-slip button holder

All about . . .

# SplatZ

Buttons are cool, but with SplatZ they are even cooler!

Many disabled children communicate and drive wheelchairs using Jelly Bean or Buddy Button switches. But switches can move around when used. That's where SplatZ comes in.

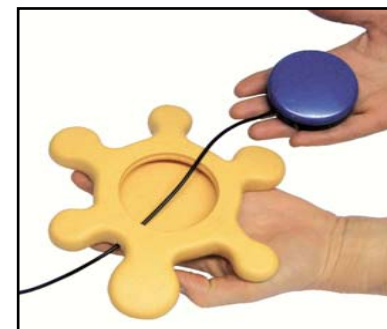

SplatZ are made from safe, hygienic silicone and are non-slip – so they stay put until you want to move them.

Being soft and squishy, SplatZ help prevent injury if children hit their switch too hard. SplatZ also hug the switches tightly, which helps extend the life of both switch and wire.

Best of all, SplatZ come in fun pastel colours – helping motivate children to use switches to open up their world!

SplatZ are so easy to use, simply...

**Pull** the cable through SplatZ...

**Push** the switch in – if it has a wide base just stretch SplatZ around it ...

**Pop** SplatZ on your tray or desk and start switching!

Because they are made from silicone, SplatZ stick best when they're clean, so just wash with mild washing up liquid and dry thoroughly.

Pictures are for illustration only. Buttons are not supplied by MERU.
